City of Paso Robles Announces Neighborhood Road Repairs and Downtown Parking Lot Renovations

PASO ROBLES, CA — The City of Paso Robles Public Works Department is breaking ground on two important infrastructure improvement projects aimed at enhancing neighborhood streets and improving parking access downtown.

Crestline/Fairview Neighborhood Road Repairs

The Crestline/Fairview Neighborhood Road Repairs Project, funded by Measure I-24, a voter-approved ½ half cent supplemental sales tax, began today, Monday, October 20, 2025. Contractor crews have distributed door hanger notices to residents in advance of the work. The project includes removing the top layer of old pavement, adding a smooth base layer to even out the surface, then applying a final layer of new pavement, and finishing with fresh road markings.

Initial activities will include potholing utilities, lowering utility covers, adjusting driveway connections, constructing rolled curbs, and performing localized dig-out repairs to prepare the roadway for paving. “No Parking” signs will be posted in active work areas as construction progresses through the neighborhood.

Paving operations are anticipated to begin toward the end of November, with project completion expected in January 2026.

Downtown Parking Lot Renovations

The second phase of the Downtown Parking Lot Renovation Project will begin the week of October 27, 2025. Commonly known as the Marv’s Pizza Parking Lot, the project involves repaving the parking lot surface, adding new concrete gutters to help with drainage, and installing new streetlights and decorative string lights (bistro lighting) to improve visibility and appearance. Construction will be completed in stages to minimize disruption and maintain business access at all times.

The renovated parking areas will:

- Increase available parking capacity

- Improve vehicle and pedestrian access
- Enhance lighting and safety
- Expand ADA parking availability
- Improve drainage
- Beautify the overall downtown environment

These upgrades will make parking downtown more efficient, accessible, and visually appealing for residents, visitors, and local businesses. The first phase of the The Downtown Parking Lot Improvements Project is the City parking lot at 12th and Railroad, is underway with completion estimated in the next month. Renovations of both lots are funded by the General Fund supplemented by an EVC Grant for electrical vehicle charging infrastructure.
