Water Main Break Causes Road Closure and Water Service Interruption

PASO ROBLES, CA – City crews are responding to a water main break located at the intersection of 24th Street and Riverside Avenue.

Riverside Avenue is closed to northbound traffic between 24th Street and Gregory Avenue while repair work is underway. Motorists are asked to avoid the area and use alternate routes to minimize congestion and allow crews to safely complete repairs.

Businesses located within the affected area (identified by the red polygons on the attached map) are currently without water service. At this time, repairs are expected to take a minimum of 10 hours to complete before water service can be restored. The estimated restoration time may change depending on conditions encountered during the repair.

City Water Department is working as quickly and safely as possible to restore service and reopen the roadway.

The City appreciates the patience and understanding of affected businesses, residents, and motorists during this repair.
